Rocket - Modern VistA Electronic Health Record Client

Rocket

About this project

Replacement for CPRS focusing on SI (Super Intelligence), modularity, and performance. Brainchild of Daniel Breznau

Compiled executable is available here under Wiki section, Downloads.

Source embedded in ADOS

Rocket / README.md

Rocket - Modern VistA Electronic Health Record Client

Rocket is a modern, open-source desktop EHR client for the U.S. Department of Veterans Affairs VistA (Veterans Health Information Systems and Technology Architecture) system. It reimagines the 25-year-old CPRS (Computerized Patient Record System) using today's technology while maintaining full compatibility with existing VistA RPC Broker infrastructure.

Status: Active Development (Stage 4 - Clinical Pages)

Screenshots

Coming soon - the UI is under active development.

Tech Stack

Layer	Technology
Desktop Shell	Tauri 2 (Rust)
UI Framework	React 19 + TypeScript
State Management	Zustand
Styling	Tailwind CSS 4
Routing	React Router 7
RPC Transport	Rust (tokio, native-tls) - XWB protocol over TCP
SI Integration	Rust -> AWS Bedrock (Claude)
Runtime	Bun
Build	Vite 6
Icons	Lucide React

Rocket - Modern VistA Electronic Health Record Client

Rocket is a modern, open-source desktop EHR client for the U.S. Department of Veterans Affairs VistA (Veterans Health Information Systems and Technology Architecture) system. It reimagines the 25-year-old CPRS (Computerized Patient Record System) using today's technology while maintaining full compatibility with existing VistA RPC Broker infrastructure.

Status: Active Development (Stage 4 - Clinical Pages)

Screenshots

Coming soon - the UI is under active development.

Tech Stack

Layer	Technology
Desktop Shell	Tauri 2 (Rust)
UI Framework	React 19 + TypeScript
State Management	Zustand
Styling	Tailwind CSS 4
Routing	React Router 7
RPC Transport	Rust (tokio, native-tls) - XWB protocol over TCP
SI Integration	Rust -> AWS Bedrock (Claude)
Runtime	Bun
Build	Vite 6
Icons	Lucide React

Features

Implemented

- VistA RPC Broker - Full XWB protocol implementation in Rust (TCP + TLS)
- PIV / SSOi Authentication - Smart card login via IAM STS SAML tokens
- Multi-patient tabs - Browser-style tab bar for multiple patients
- Cover Sheet - Dashboard with allergies, problems, meds, vitals, labs, reminders
- Clinical Pages - Notes, Problems, Medications, Orders, Labs, Consults, Reports, Vitals, Surgery, D/C Summaries, Imaging
- SI Panel - Integrated SI analysis (Assessment & Plan, Dx List, Safety Checks, etc.) via AWS Bedrock
- Medical References - Point-of-care clinical decision support built into the SI agent (see below)
- Command Palette - Ctrl+K quick navigation and order search
- Dark/Light/Auto Theme - Follows Windows system preference
- Plugin System - Extensible architecture for custom pages, widgets, and SI prompts
- Auto-update - Network share-based shadow copy updater
- Site Auto-detection - Reads machine hostname to auto-select VistA server

Planned

- Order entry dialogs (complex orders, order sets)
- Note authoring with template system
- CCOW patient context sharing
- Patient timeline (unified chronological view)
- 508 accessibility compliance

Medical References (Point-of-Care)

Rocket's SI agent includes built-in access to medical reference data, enabling evidence-based clinical decision support without any local databases or commercial subscriptions. All data is fetched on-demand from free public APIs.

Clinical Calculators (40+)

Compiled directly into the Rust binary - no API calls, instant results. Each returns an exact score, clinical interpretation, and literature citation.

Category	Calculators
Cardiovascular	Wells DVT, Wells PE, CHA2DS2-VASc, HAS-BLED, HEART, TIMI NSTEMI/STEMI, GRACE, ASCVD Risk, MAP, QTc (Bazett)
Pulmonary	CURB-65, PERC Rule
Critical Care	qSOFA, SOFA, APACHE II
Renal / Metabolic	Cockcroft-Gault, CKD-EPI 2021 eGFR, Corrected Calcium, Anion Gap, FENa, Winter's Formula, BMI
GI / Hepatology	MELD-Na, Child-Pugh, FIB-4, Alvarado, Maddrey DF, West Haven
VTE Prophylaxis	Padua VTE Risk, Caprini
Neurology	GCS, NIHSS, ABCD2
Psychiatry	PHQ-9, GAD-7, AUDIT-C, CAGE, C-SSRS, MoCA/MMSE, 4AT Delirium
ENT	Modified Centor
Conversions	Steroid equivalence, Opioid MME

Drug Reference APIs

Source	Data Provided	API
DailyMed (NLM)	Full FDA drug labels - indications, dosing, contraindications, black box warnings, adverse reactions	dailymed.nlm.nih.gov
RxNorm (NLM)	Drug name normalization - brand <-> generic <-> ingredient mapping	rxnav.nlm.nih.gov
MED-RT / RxClass (NLM)	VA drug classes, mechanism of action, pharmacologic class	rxnav.nlm.nih.gov
RxNorm Interactions (NLM)	Drug-drug interaction checking with severity ratings	rxnav.nlm.nih.gov
OpenFDA (FDA)	Post-market adverse event data (FAERS)	api.fda.gov
PubMed (NLM)	Systematic reviews, meta-analyses, clinical trials	eutils.ncbi.nlm.nih.gov

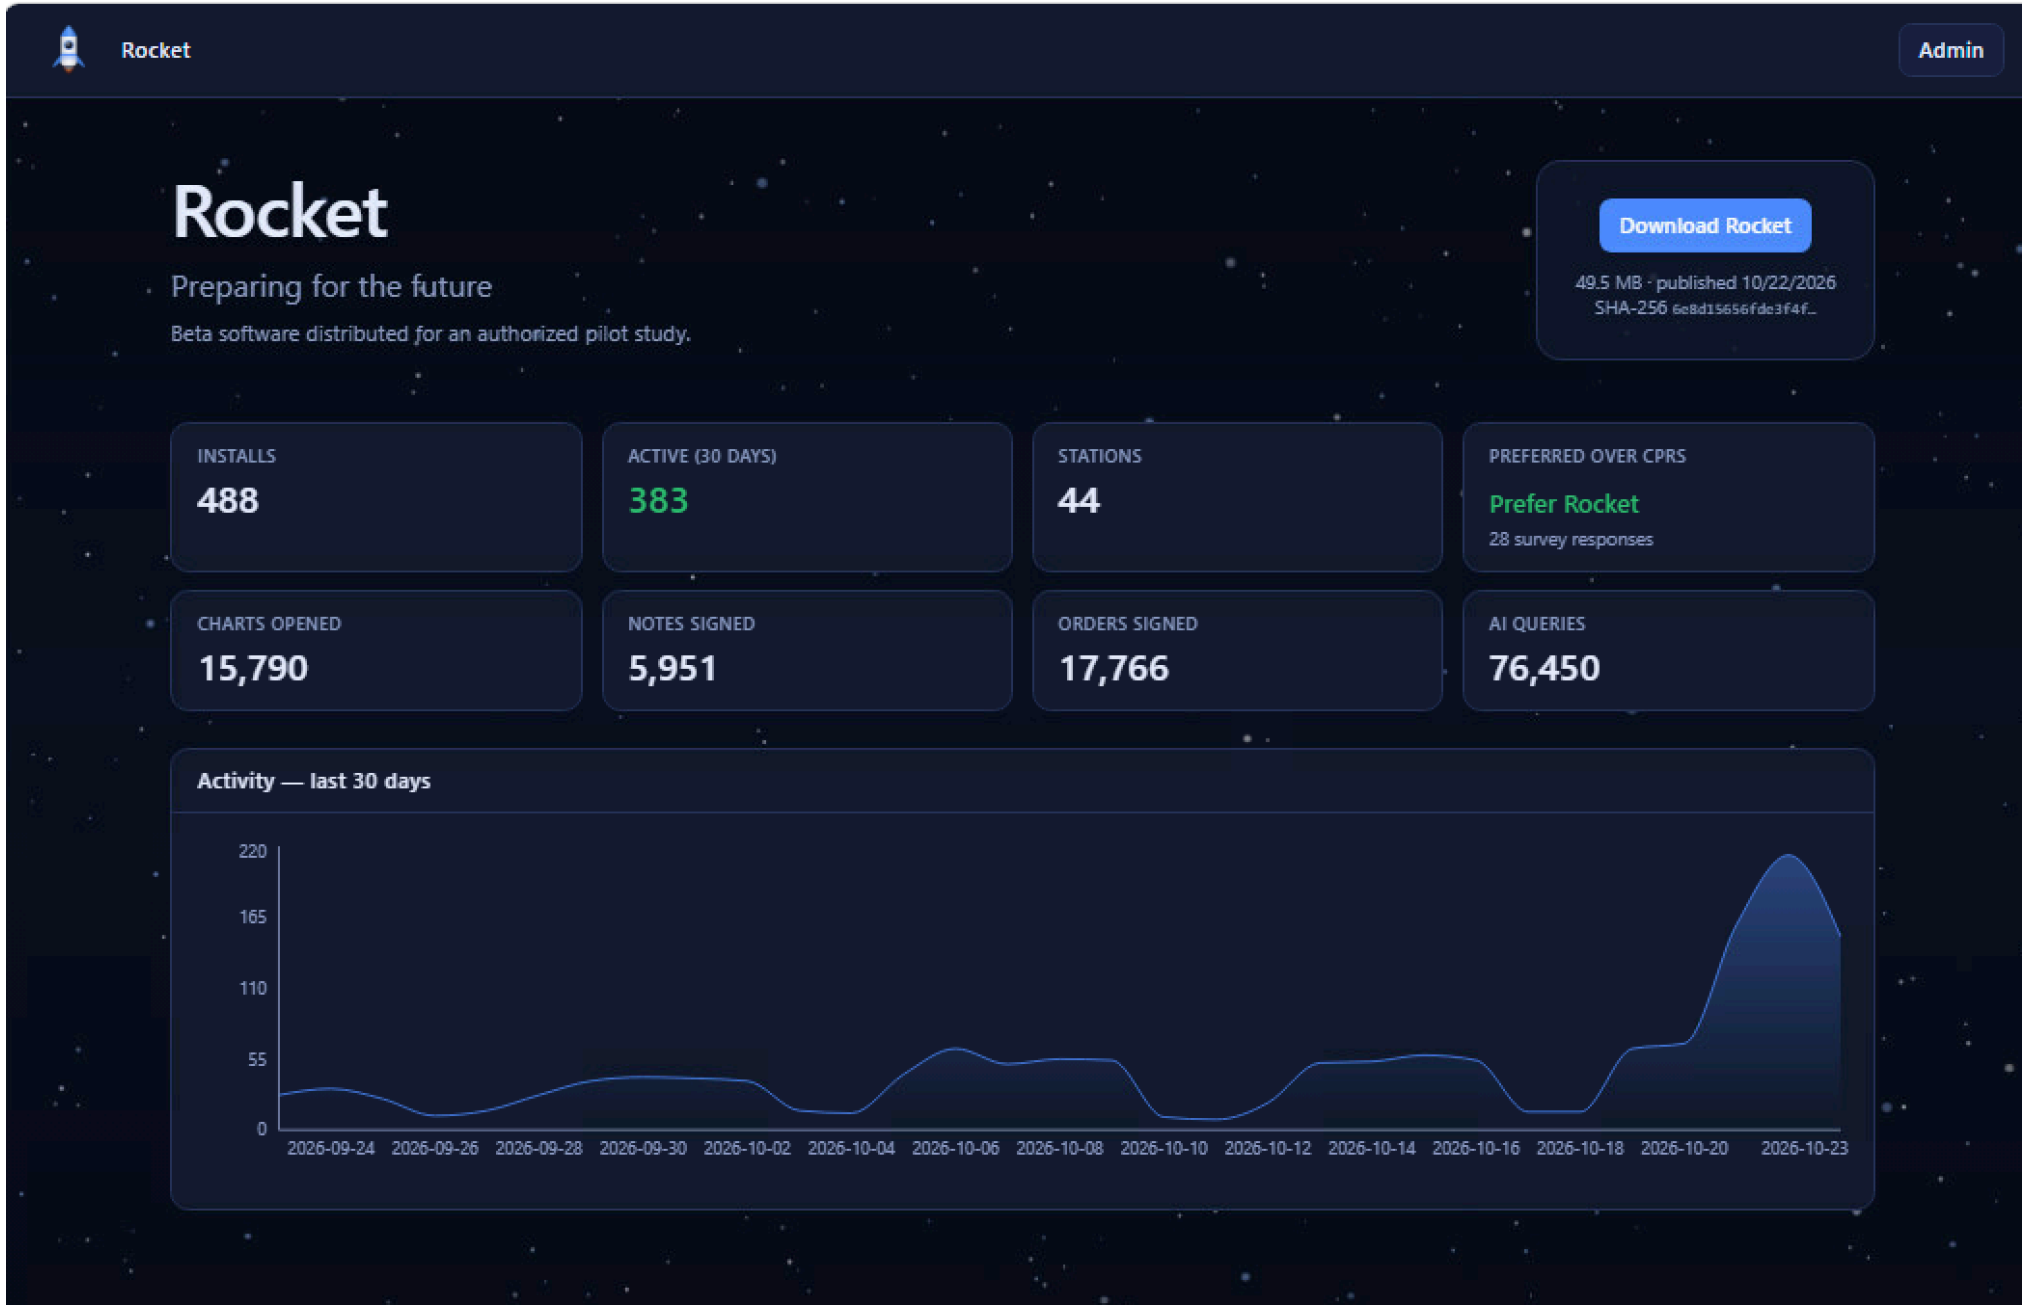

All APIs are free, require no authentication, and are provided by NIH/NLM/FDA as public health resources.

Prerequisites

- Windows 10/11 (required - uses Win32 APIs for PIV cert access)
- Bun >= 1.x
- Rust >= 1.75
- Tauri CLI - installed via `bun add -g @tauri-apps/cli`
- VA network access - VistA RPC Broker requires internal VA network connectivity

Project stats (from ADOS page)

Beta software — pilot study participation

VA SYSTEMS GENERAL TERMS

This U.S. government system is intended to be used for viewing and retrieving information only, except as otherwise explicitly authorized. VA information resides on and transmits through computer systems and networks funded by VA. All use is considered to be with an understanding and acceptance that there is no reasonable expectation of privacy for any data or transmissions on Government Intranet or Extranet (non-public) networks or systems. All transactions that occur on this system and all data transmitted through this system are subject to review and action including (but not limited to) monitoring, recording, retrieving, copying, auditing, inspecting, investigating, restricting access, blocking, tracking, disclosing to authorized personnel, or any other authorized actions by all authorized VA and law enforcement personnel. All use of this system constitutes understanding and unconditional acceptance of these terms.

Unauthorized attempts or acts to either (1) access, upload, change, or delete information on this system, (2) modify this system, (3) deny access to this system, or (4) accrue resources for unauthorized use on this system are strictly prohibited. Such attempts or acts are subject to action that may result in criminal, civil, or administrative penalties.

PILOT STUDY TERMS

Rocket is pre-production software distributed as part of an authorized pilot study.

CPRS remains the default system of record. If there is any ambiguity, verify content in CPRS before acting on it, and complete all documentation and order signing in accordance with local policy.

AI-generated content (summaries, note sections, extracted text) may be incomplete or incorrect. A licensed clinician must review all AI output before it is used in patient care.

Rocket is clinical decision support for licensed clinicians. It offers suggestions, differential considerations and drafts, with sources you can check, for your independent review. It does not make diagnoses or treatment decisions for you and does not replace your clinical judgment.

☐ I have read the above and I am an authorized pilot participant.

Rocket – Reimagining EHR Workflows

Brainchild of Dr. Daniel Breznau – Bay Pines VA / AI Lead (adapted Dan's slides)

Problem:

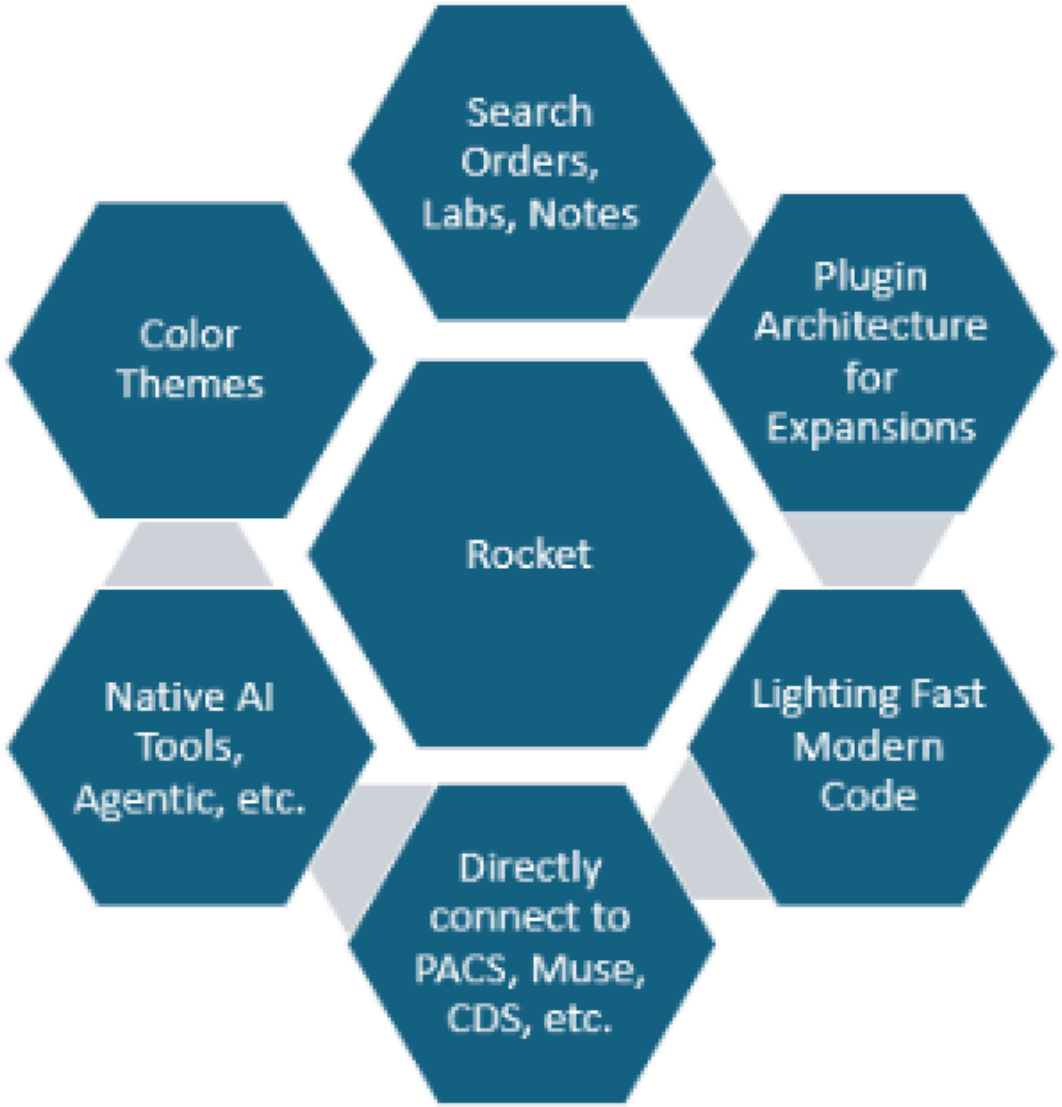

Clinical care and data is spread out between different interfaces and different systems.

- Remote VistA sites
- VistA Imaging
- Muse ECGs
- CDS console (profile pictures)
- JLV
- Ambient Scribe tools - AI Models (via Bedrock and Azure OpenAI)

Many interfaces are dated and slow.

» Example: 90 seconds to load an ECG

…lots of new features:

More:

- ✅ Bulk readmission analysis
- ✅ Pre-charting summary
- ✅ Ambient scribe built in
- ✅ Streamlined processing View Alerts
- ✅ AI enhanced spellcheck
- ✅ Care team links to Teams
- ✅ Enhanced lab view
- ✅ Feedback submission
- ✅ Synonym matches in search
- ✅ Undo / redo
- ✅ Customizable interface
- ✅ Note formatting, backwards compatible
- ✅ Highlights notes of same specialty as user.

Thank you.

OTHER APPOINTMENTS (28)		
Jul 27, 2026@08:00	San Pact 1 Prov	Cancelled By Clinic
Jul 10, 2026@14:41	Lb Chiro Fol Up 1	Checked Out

885 out · 54542 in

Based on the chart, this patient's **last completed ischemic evaluation was a cardiac catheterization on September 30, 2010** (consult ID 1456525) — **over 16 years ago.**

More recent stress tests that were cancelled:

- **TMST (treadmill stress test)** ordered 07/27/2026 — cancelled
- **Cardiac catheterization** ordered 02/24/2026 — cancelled
- **Thallium pharmacologic stress** and **thallium TMST** ordered 06/28/2022 — both cancelled

Given this 91-year-old patient's active angina [1], old MI [2], and HFrEF [3] with **persistent tachycardia (HR 130)** [4] and **zero GDMT** (no beta blocker, ACE-I/ARB, or antiplatelet therapy beyond aspirin — which he's actually **allergic to** [5]), the lack of recent ischemic evaluation is concerning, though multiple cancellations suggest either patient preference, medical unsuitability, or goals-of-care considerations.

What was the patient on for diabetes outpatient and last A1C?
843 out · 34984 in
Outpatient Diabetes Medications:
Insulin glargine 10 units subcutaneously daily
Empagliflozin 12.5 mg PO daily (taking half of a 25mg tablet)
Last A1C:
7.8% on 10/25/2025
Note: Patient has documented metformin allergy (diarrhea, moderate severity), which explains why they're not on metformin despite T2DM.
Current admission glucose was 298 mg/dL, indicating poor outpatient glycemic control. The H&P notes empagliflozin is being held while inpatient, and the patient is on basal-bolus insulin (glargine 10 units daily + aspart with meals and correction scale).

…lots of new features:

More:

- ✅ Bulk readmission analysis
- ✅ Pre-charting summary
- ✅ Ambient scribe built in
- ✅ Streamlined processing View Alerts
- ✅ AI enhanced spellcheck
- ✅ Care team links to Teams
- ✅ Enhanced lab view
- ✅ Feedback submission
- ✅ Synonym matches in search
- ✅ Undo / redo
- ✅ Customizable interface
- ✅ Note formatting, backwards compatible
- ✅ Highlights notes of same specialty as user.

Thank you.
